**CIAS WORKSHOP** aims to educate psychiatrists and trainee, and will introduce the Continuing Medical Education (CME) Series on CIAS, developed collaboratively by experts from Singapore, Malaysia, Thailand, South Korea, and Australia.

Upon completion of this workshop, you will:

1. Understand the burden of CIAS on patients and society.
2. Describe the pathophysiology of CIAS including the roles of genetic and environmental factors.
3. Know how to recognize the risk factors for CIAS, enabling you to facilitate a prompt assessment.
4. Understand the different instruments for assessment of cognitive function and impairment and how to choose them appropriately.
5. Understand the current practices for CIAS management.
6. Recognize steps to personalizing a patient’s CIAS management regime.
7. Understand the emerging research areas in CIAS.
